***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 8,10 and 12 are rejected under 35 U.S.C. 102(b) as being anticipated by Elam, et al-4088131.

Elam discloses a device having a body portion with a 1<sup>st</sup> opening 36 in communication with a gas supply 18, a 2<sup>nd</sup> opening 26 in communication with a user. The gas is delivered from the 1<sup>st</sup> opening to the 2<sup>nd</sup> opening during inhalation, but a valve redirects air from the supply and 1<sup>st</sup> opening to go through 1<sup>st</sup> and 2<sup>nd</sup> auxiliary openings 30 during exhalation so that excess breathing gas is vented to the atmosphere.

The gas supply is a conventional oxygen tank which clearly has the ability to supply oxygen gas continuously at a pressure above ambient. In addition, col. 4 lines 52-56, it is clear that gas is being delivered by the source continuously.

***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Art Unit: 3761

The factual inquiries set forth in *Graham v. John Deere Co.*, 383 U.S. 1, 148 USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:

1. Determining the scope and contents of the prior art.
2. Ascertaining the differences between the prior art and the claims at issue.
3. Resolving the level of ordinary skill in the pertinent art.
4. Considering objective evidence present in the application indicating obviousness or nonobviousness.

This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

Claims 9,11 and 13 are rejected under 35 U.S.C. 103(a) as being unpatentable over Elam, et al.-'131.

Elam discloses the invention as claimed with the exception of the humidification means. As it is well-known in the art to humidify inhalation gases, to have provided such a means in Elam's device would have been an obvious design choice in order to provide moister air which is easier to breathe for certain patients.

***Allowable Subject Matter***

Claims 14-21 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Claims 1-7 are allowed.

***Response to Arguments***

Applicant's arguments filed 05-27-03 have been fully considered but they are not persuasive.

A conventional tank would, or at the very least has the capability to, provide gas at a continuous rate, which is all that is necessary to read on the claim limitations.

***Conclusion***

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Glenn K Dawson whose telephone number is 703-308-4304. The examiner can normally be reached on M-Th 7:30-5:00.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Weilun Lo can be reached on 703-308-1957. The fax phone numbers for the organization where this application or proceeding is assigned are 703-305-3590 for regular communications and 703-306-4520 for After Final communications.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the receptionist whose telephone number is 703-308-0858.
